

## 5.1.2 Student support and facilities

The institution has given the facilities for students support and facilities in the college as well as in the hostel. Since it is the residential college, most of the students are in hostel and therefore they are given the facilities like drinking water from Aqua guard, running water 24x7, hot water, spacious Rooms, electricity and well-constructed toilets in the college and hostels. They are given medical care as well. **When they are sick the vehicle is provided to take them to the hospitals and treatment is given. After they come back from the hospitals good care is being given like extra food materials provided them.** In the college there is sick room, reading room for the self-study and one common room where they can rest or change their dresses if needed. There is multipurpose hall for different activities to be performed. There is solar water facilities for the hot water.
